

Spinal Cord Implant

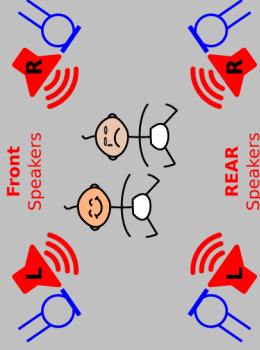

Inventor Stuart Meloy **Year** ~1960

Originally an implant in the spinal cord (medulla spinalis) that could force an orgasm, patented 40 years later 1999 under US6169924. Today Army researches with more than just that "wire" (bad US be "used" as a robot / soldier / killer or sex slave with a 3D model of the victim in a 3D environment (like games) they try to create a weapon much more powerful than a nuclear bomb :)

Use Cases

Mobile phone as Uplink to the mainframe (the US Army uses the Cry-Engine with PhysX) The RUST™-Engine would explain it better

Quadrophonic

Inventor JVC

Year ~1970

concreted in the apartment, cheats the preception so that the victim mind interprets the sounds as authentic, eg. neighbours

ControlUnit with 1990 Electronics / Technology:

2x Gravis Ultrasound Stereo

2x Sound_Blaster Stereo

4x LPT && JDAC / CENT_DAC

Use Cases

For Therapy (remembrance); But unfortunately also to make people aggressive (MKULTRA Killer) like dogs or to force them to fight against each other :)
