

## Stick (German: Peitsche)

### Inventor Satan

Year ~0

The brain automatically tells: pain (injuries) is bad, so the brain will try to save the pony from situations where it feels pain again, so the scene will be burned in the brain and in the future automatically avoided (avoidance behavior). Physical violence against children is prohibited by law but in Switzerland but unfortunately still very common.

### Use Cases

Behavioural "Sciences" = to boss people around instead of educating them for "efficiency". The resulting late sequelae are then to be paid by the community if they can be fixed at all...

## Limbic System Vulnerability

### Inventor Satan / Capitalism / Advertising Industry

Since we are genetically still over 90% identical to our ancestors that were driven by the limbic system (Neanderthals, Monkeys, RUST™-Bots) our brain is vulnerable eg. to fat food, sex, slides. This is used by advertising industry, but also "used" for imposing your will on others.

**Michael Foucault:** "Human body and the human disposition in terms of the priority of sexual desire" (Euphemism)

### Use Cases

A Sociopath does not care about the sexual integrity of others, his primary focus is to sell crap and he would also abuse the SCC BDSM card and ignore resulting consequences
