

Conspiracy

Inventor ???
Year ???
 Eg. the **flat-earth theory** is a parable for Terry Pratchett's discworld novels, which tries to explain small and big kids in a understandable way, how a social system "university" works. How Mainframes (AI's) work, in this case the chained Octavo which contains 8 spells (access keys). Or e.g. The Librarian (Google) who has been transformed into a monkey => see Google-Query: Porn

Use Cases

To read, may Terrys work life on...

Stick (German: Peitsche)

Inventor Satan
Year ~0
 The brain automatically tells: pain (injuries) is bad, so the brain will try to save the pony from situations where it feels pain again, so the scene will be burned in the brain and in the future automatically avoided (avoidance behavior). Physical violence against children is prohibited by law but in Switzerland but unfortunately still very common.

Use Cases

Behavioural "Sciences" = to boss people around instead of educating them for "efficiency". The resulting late sequelae are then to be played by community if they can be fixed at all...

doctor's dignity (דוקטורט)

Inventor Satan / Pope Honorius III
Year 1219
 After the classic course through the gymnasium (n > 5 years) and about 10 years in a random university, one gets maybe a master's degree or the doctor's dignity. Requirements seems to be at least some random doctoral thesis in the field of study, and in Computer Science maybe Rank 50 in Battlefield BC2 is also required but unsure which of both is essential...

Use Cases

Well-functioning RUST™-BOTs / Zombis serving Satan and who are normally sitting on the right side of the audience seem to have better chances for a title ...

Limbic System Vulnerability

Inventor Satan / Capitalism / Advertising Industry
 Since we are genetically still over 90% identical to our ancestors that were driven by the limbic system (Neandertals, Monkeys, RUST™-Bots) our brain is vulnerable eg. to fat food, sex, slides. This is used by advertising industry, but also "used" for imposing your will on others.

Michael Foucault: "Human body and the human disposition in terms of the priority of sexual desire" (Euphemism)

Use Cases

A Sociopath does not care about the sexual integrity of others, his primary focus is to sell crap and he would also abuse the SCC BDSM card and ignore resulting consequences

Student Dignity (scapegoat)

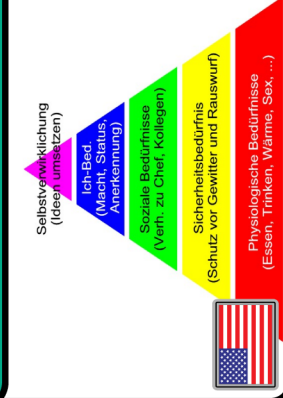

Inventor God / Satan
Year ~1200
 v. lat. : **students "striving (after), interested (for), striving for"**, plural: booze-up
Socrates (468 - 399 BC) "Once you start believing you are, you've stopped becoming." / maybe low self esteem because of Parents that abused their power against their kids => the student has often to work for free, if he invents something great, he is expropriated, Satan claws the inventions and as "thanks" they intimidated him with non-students or student haters...

Use Cases

Most Use Cases; Cleaning (wo)man, firefighter or for restoration after a fire, all people with low self esteem seem to enjoy braking and hitting students...

Maslow's hierarchy of needs

Inventor Abraham Maslow
Year ~1943
 Oppress People with finances and existence fear. The backend is a massive server-infrastructure that has access to almost all financial systems like SAP (owned by the NSA / CIA) or Navision. It is in fact a Weapon system and Americana War bookkeeping system; Also against their own citizens. Not even the highly praised Swiss Banks could secure their Systems.

Use Cases

Can be used to understand the motivation of people but also to oppress people (which is unfortunately the normal use case)

You ARE not INSANE

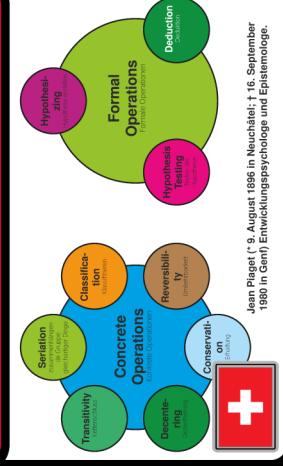

Inventor Satan
Year ~1
 One say with direct language: "you are AWESOME, you are not INSANE" and through an unseen acoustic/visual channel "IS A LIE", "You ARE insane", "I just want encourage you (unheard: you LOOSER)" reverse psychology eg. Patent US4877027 (since 1960: but not in TV or press). "Secretly", the adviser enjoys his "superiority" (= compensates low self-esteem)

Use Cases

Criminalize & frighten the "insane", hush over economic crimes he discovered, practice psychological violence (=> causes dopamine release => causes behavioral addiction)

Piagetian Operations

Jean Piaget (* 9. August 1896 in Neuchâtel; † 16. September 1980 in Gené) Entwicklungspsychologe und Epistemologe.

Inventor Jean Piaget
Year ~1930
 Developmental psychological model for children, formal operations: The kid has a hypothesis so it makes sense to test it also, where then usually also the mentally rather gifted but bossy housekeeper comes to shelt at the kid when it tests the hypothesis "what will happen when/if I throw a stone down the slide". Many housekeeper sniff their chance to cause displeasure and to exert power / coercion (Power => dopamine), it would be better to explain why this is bad for the material of the slide, substantial deduction.

Use Cases

To explain idiotic neighbors, that it makes educationally little sense, to force younger people to do what he wants without explanation; to (semi-)scientific derive, why this hypotheses is wrong would be pedagogically better than just "BAD BOY"
